

The Operating System for Creative Professionals

Crea8or is an enterprise-grade Business Operating System (BOS) consolidating CRM, automated proposals, Paystack payment rails, shoot call sheets, branded 4K photo proofing, and frame-accurate video review into one high-end dark platform.

◆ 1. The Core Problem & Market Opportunity

The Current Frustration (Old Way)

- Creators juggle 5+ disconnected tools (HoneyBook, Pixieset, Frame.io, Excel, WhatsApp).
- Forced to pay expensive USD subscriptions with international cards.
- Delivery via unbranded Google Drive links damages luxury client perception.
- Manual bank transfers cause friction, delayed deposits, and quote drop-offs.

The Crea8or Solution (The BOS)

- **1 Unified Platform** handling the full lifecycle from lead to delivery.
- **African payment rails first** (₦ NGN, GHS, KES, USD) via native Paystack.
- **Luxury 4K client portals** commanding 3x higher client rates.
- **Instant digital proposal signing & deposits** closing deals in <15 mins.

◆ 2. Complete Product Architecture

⚡ 24/7 Booking Engine

Customizable package picker with real-time add-on calculations and automatic Paystack deposit quotes.

📅 Leads Kanban CRM

Visual deal pipeline tracking inquiries from initial contact through quote sent, negotiation, and booking.

📄 Dynamic Proposals

1-click proposals with dynamic tax/discount math, digital signatures, and automated invoice reconciliation.

📄 Shoot Call Sheets

Printable & digital production call sheets with GPS coordinates, crew times, gear checklists, and weather info.

📷 4K Photo Galleries

Pixieset alternative with dark luxury masonry layouts, camera EXIF inspection, and album favoriting.

📺 Video Review Player

Frame.io alternative with timecode markers, timestamped feedback jumping, and 1-click cut approvals.

◆ 3. Competitive Matrix

CAPABILITY	CREA8OR BOS	HONEYBOOK / DUBSADO	PIXIESET / PIC-TIME	FRAME.IO
